

# EQUIPMENT PLATFORM TO RETRO-FIT EXISTING TRUCKS FOR DE-ICING

---

Using existing tanks and trucks, convert old equipment into useful productive spraying equipment.

Here an existing tanker that was used originally for gravity feed system now has our Equipment Platform and is ready for uniform spraying and self filling of the anti-icing, de-icing, dust control, and brine liquids.

The Equipment Platform is ready to bolt down, with 12volt on/off control valve and a 1" manual discharge port, 2" suction port and 2" quick coupled valve fill port. Included with the Platform is a standard Spray Bar, Electrical on/off in cab control, Bypass return line, all the hose fittings and valves needed.

Options available are Ground Speed Flow Control, which monitors the flow of liquid with the speed of the vehicle from MicroTrak with GPS Speed sensing.
