

De-icing Equipment

Standard & Dual Spray Bar

All spraying equipment includes the standard 1 ½” dia. Spray bar with 5 quick coupled spraying nozzles for winter use. Also included with these spray bars are the addition of 9 drill tips to penetrate the hard pack snow and get liquid to the road surface. These are also quick coupled for quick changes when needed.

Dual spray bars have the same features but allow you to change the sprayer pattern without getting out to change the nozzles. Requires dual 12 volt control valves

Also available:

- **Directional Nozzles can be set for aiming at select road areas.**
- **Reese Hitch adapter**
- **Side spray attachments**
- **Dust control nozzles for use in summer**
